

# INCREASE YOUR OUTDOOR PROJECT SALES WITH DECORATIVE HARDWARE

# MiTek®

- OZCO is the industry leading manufacturer in the Ornamental Hardware category: 9+ patents to prove it.
- MiTek stocks 2 distinctive styles; Ironwood and Laredo Sunset.
- MiTek's national distribution foot print means product is readily available.
- Many products are adjustable. This ensures a tight fit on any type of lumber and limits the number of SKUs you need to keep in inventory.
- Products are manufactured with thicker steel, are hot dipped galvanized and powder coated, providing superior performance and a more aesthetically pleasing appearance.
- Most products are sold in kits to ensure everything needed for installation is included.
- Attractive, informative packaging that remains intact from store to job site.
- Patented Timber Bolts tighten from the inside out and adjust over 2" for a perfect fit. This provides a beautiful look and eliminates the need to trim unsightly and potentially dangerous bolt ends.
- Timber Screws provide excellent performance and can be installed with the Hex Cap Nut or Hammered Dome Cap Nut for the desired decorative style.
- Hardware has been tested and has code reports.
- MiTek national sales force is available for product training and support.
- MiTek and OZCO products can be combined on the same order, which allows for more frequent orders and better inventory control.
- OZCO and MiTek offer the best online and software support in the industry.
- Free Project Planner App for iPad.
